

Since 1981, Aaron Oil Company, LLC (AOC), a Tradebe company, has been a trusted leader in used oil recycling and petroleum materials management. With decades of regulatory expertise and a commitment to environmental stewardship, we help customers manage complex waste streams while reducing liability and supporting sustainability goals.

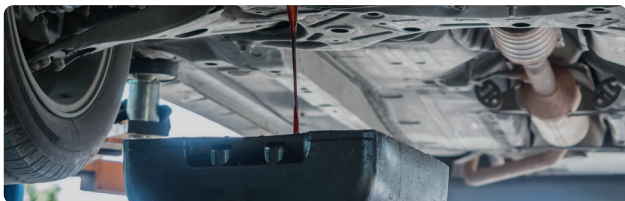

Headquartered in Saraland, Alabama, with marine operations in Mobile, AL and Berwick, LA, AOC delivers cradle-to-grave solutions supported by in-house processing, advanced laboratory testing, and one of the industry's most versatile transportation fleets.

These capabilities support AOC's integrated services focused on compliance, efficiency, and resource recovery.

USED OIL & PETROLEUM MATERIALS MANAGEMENT

We specialize in transforming **used oils, greases, and petroleum-contaminated materials** into reusable energy through advanced recovery processes. Our program reduces disposal costs, minimizes environmental liability, and ensures full regulatory compliance. Recovered fuels are tested, certified, and reused in industrial applications that meet **ASTM** and **IMO standards**.

- ✓ Used motor, hydraulic, and industrial oils
- ✓ Oil filters, greases, and oily debris
- ✓ Oily water and petroleum contact water (PCW)
- ✓ Transmix, tank bottoms, and petroleum sludges

ABSORBENT MANAGEMENT SOLUTIONS

Oil-soaked absorbents don't have to end up in a landfill. We recover reusable hydrocarbons from **absorbent pads, booms, rags, and contaminated solids**. Through specialized processing at our Saraland facility, absorbents are pressed to recover fluids and responsibly manage remaining solids under strict **RCRA** and **TCLP standards**.

- ✓ Reduced landfill disposal
- ✓ Recovered hydrocarbons for recycling
- ✓ Lower regulatory and environmental liability
- ✓ Full cradle-to-grave documentation

INDUSTRIAL CLEANING SERVICES

We provide industrial cleaning services for **tanks, pipelines, railcars, terminals, and maritime vessels**. Our certified crews and specialized equipment deliver safe, efficient cleaning while minimizing downtime and regulatory risk. Recoverable materials generated during cleaning are recycled whenever possible, supporting sustainability and cost control.

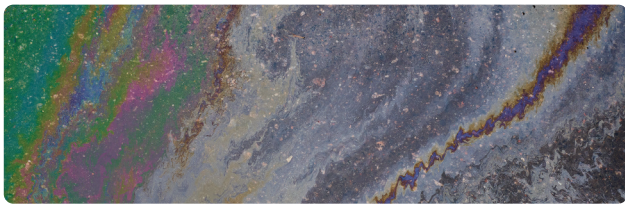

- ✓ Tank cleaning and sludge removal
- ✓ Pipeline, railcar, and vessel cleaning
- ✓ Degassing and vapor control
- ✓ Sump and separator cleaning

WASTEWATER TREATMENT SERVICES

We offer Clean Water Act-compliant treatment for **oily water, PCW, and industrial wastewater**. Our **centralized waste treatment (CWT)** facility removes oils, solids, and contaminants through a controlled, multi-stage process. Each load is tested, tracked, and documented to support compliance, reporting, and environmental protection.

- ✓ Oil-contaminated water and PCW
- ✓ Industrial cleaning wastewater
- ✓ Sump, separator, and bilge water
- ✓ Antifreeze and coolants

AQUEOUS PARTS WASHER SYSTEMS

As an official Magido distributor, Aaron Oil provides aqueous parts washer systems that deliver powerful, **solvent-free cleaning** for industrial and automotive applications. Using high-pressure spray technology, these systems remove **grease, oil, and contaminants** from parts with minimal operator involvement. The systems integrated oil skimmer recovers used oil for recycling.

- ✓ Solvent-free, water-based cleaning
- ✓ Durable 304 stainless steel construction
- ✓ Automated oil removal and reuse
- ✓ Reduced waste and operating costs
